

18 Nov 2024, Berchem

To whom it may concern

Dear Sir/Madam,

I-Coats N.V. guarantees that all our products currently supplied are Reach¹ conform. I-Coats supplies preparations (mixture of substances) and not substances (we are active in the "mixture chemistry" and not in the "reaction chemistry"). Preparations cannot be(pre)registered, only substances can.

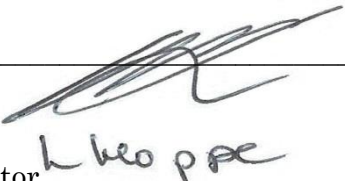

We, hereby, confirm that the substances mentioned in the Candidate List of Substances of Very High Concern of the REACH¹ statement (updated 07/11/2024) which is published in accordance with Article 59 (10) and the substances mentioned in ZDHC MSRL version 3.1 (updated nov 2022) are not used for more than 0.1% by weight in the composition of preparations/articles that we supply. Also Furthermore we do not use per- and polyfluoroalkyl substances (PFASs), so we expect our products to meet ECHA's restriction proposal²

Furthermore, to the best of our knowledge the chemicals on the current Californian Proposition 65 List³ (29/12/2023) nor the chemicals on the Annexes EU 2019/1021 (POP Guideline⁴) are not used in our preparations.

Consequently we do not routinely analyse these substances. For as far as we can judge and with the information at hand, we don't foresee that any of our products will disappear because of the regulations mentioned above. Should this situation change, we will inform our customers.

Our products are not explosive, not inflammable, not toxic, not radioactive, not corrosive, not oxidising and do not contain any biological reactive substances classified as dangerous under the I.A.T.A. standards or A.D.R. regulation.

Our best regards,

Director
I-Coats N.V.

Information in this publication is to the best of our knowledge true and accurate. However, since conditions under which products may be used are beyond our control, recommendations are made without warranty or guarantee. This statement does not affect the statutory rights of a consumer.
